Alsons Power current capacity to more than double in 3 years -will supply over 1/4 of Projected Mindanao Peak Demand by 2016.

Alsons Power- the Alcantara Group's power project development and power generation management business unit is on track to produce an additional 282 Mega Watts (MW) of electrical power by 2016 to meet power-starved Mindanao's growing demand for electricity. Alsons Power's current capacity is at 181 MW coming from its three operating power facilities: the revamped Mapalad Power Corporation (MPC) plant in Iligan City - currently producing 26 MW; the Southern Philippines Power Corporation (SPPC) plant in Alabel, Sarangani - with a present generating capacity of 55 MW; and the Western Mindanao Power Corporation (WMPC) plant in Zamboanga City -with a full capacity of 100 MW.

The added 282 MW of power will come from: the MPC plant in Iligan which is expected to add 72 MW and reach full 98 MW capacity by September of this year; the first phase of the Sarangani Energy Corporation (SEC) coal-fired plant currently undergoing construction in Maasim, Sarangani which will produce 105 MW when it begins operating in 2015; and the prospective San Ramon Power, Inc. (SRPI) coal-fired plant in Zamboanga City which is slated to start producing 105 MW upon commencing operations in 2016. The resulting aggregate electrical capacity to be generated by Alsons Power in 2016 will be 463 MW -more than 1/4 of the Department of Energy's projected 2016 Mindanao peak power demand of 1,829 MW.

The SEC plant in Maasim Sarangani has completed the site clearing phase of construction with site grading, excavation and leveling currently ongoing in preparation for setting up the plant's structural framework later this year. The SRPI facility in Zamboanga secured its Environmental Compliance Certificate (ECC) from the Department of Environment and Natural Resources (DENR) and signed up Daelim Industrial Co., Ltd. of South Korea as the plant's engineering procurement and construction contractor in 2012. It is in the last stages of securing an approval from the Energy Regulatory Commission (ERC) of its Power Sales Agreement (PSA) with the Zamboanga City Electric Cooperative, Inc. (ZAMCELCO). The SRPI plant's contractor is expected to receive a notice to proceed with the engineering and construction process before the end of 2013. Both the SEC and SRPI plants have signed power sales agreements with key distribution utilities in Mindanao.

The power generation facilities being operated and developed by Alsons Power are all direct or indirect subsidiaries of publicly-listed Alsons Consolidated Resources, Inc. (ACR).
