Reply to Inquirer article dated April 8, 2013

Dear Madam:

We reply to your email dated April 8, 2013 with regard to the attached news article entitled: "Alsons seeks partners for power plant" posted in the *Inquirer.net* on April 8, 2013, which reported, among others, the following:

Manila, Philippines—Alsons Consolidated Resources Inc. of the Alcantaras is planning to tap strategic equity partners that will help fund its planned \$900-million (or roughly P36.9 billion) coal-fed power plant at the Tampakan copper-gold mine site in South Cotabato.

The potential equity partners for the 400-megawatt coal-fired power plant may include Sagittarius Mines, Inc., the proponent of the planned development of the Tampakan, which is said to hold the world's biggest known copper deposit, according to ACR chief financial officer Luis R. Ymson, Jr.

"Alsons will conduct new fund-raising to build the 400-MW plant. The whole power station for the mine will be developed by Alsons with other possible strategic partners. Sagittarius Mines, Inc. will be the sole offtaker [of the electricity to be generated by] the power plant. It can also have an equity stake in the power plant," Ymson told the *Inquirer* in an interview.

Ymson said the company was looking at various financing options to raise the amount needed for the power plant, which it will build through its subsidiary, Alsons Energy Development Corp.

"We are still studying, but it will be a combination of equity capital raising and project financing, including possible entry of partners to share in equity capital needs. Since it will take three years to build the plant, we will commence fund-raising four years before the mine starts operations," he said.

Alsons Energy earlier said that the preliminary project development undertakings for the power facility, such as project financing, were expected to commence within this year.

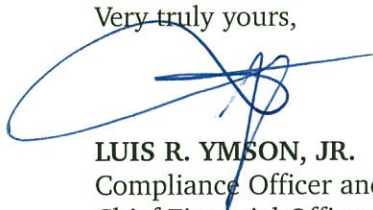

The company is expected to start generating electricity from the proposed coal plant by 2017. By the middle of 2019, the coal facility is expected to be fully operational, in time for the start of commercial operations at the Tampakan mine.

.....

We confirm to all trading participants and the public that the process for financing the 400MW coal-fired power plant for the Tampakan copper-gold mine will involve the usual combination of equity and debt, and that the various options for both fundraising activities are still under study. The entry of strategic partners remains an option. We reiterate that the commencement of the fundraising and construction of the power plant project is dependent on the timing of the Tampakan mine project, allowing for four years of advance preparations to when the mine project is scheduled to commence.

We hope this clarifies the information contained in said article.

Very truly yours,

A handwritten signature in blue ink, appearing to read 'Luis R. Ymson, Jr.', with a large, stylized flourish extending to the left.
